

# Publish Your CarGurus Dealer Page

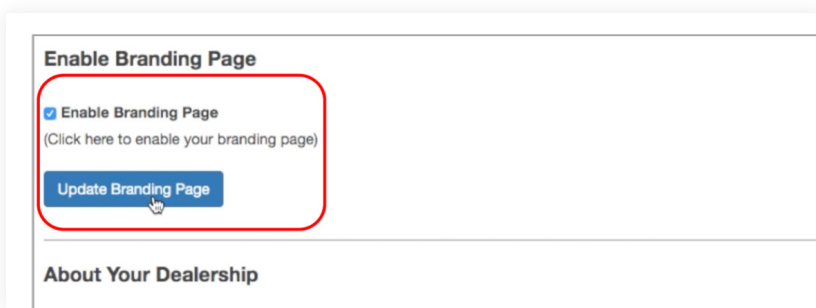

Your CarGurus package includes a branded page to help you build a digital presence that shoppers can trust - a space for service information, photos, dealership amenities, and more.

## Set up your page in 3 easy steps:

- 1 Log in to your CarGurus Dealer Dashboard and go to the "Settings" tab.

- 2 Scroll down and click "Enable Branding Page" and "Update Branding Page" to publish.

- 3 Fill in your dealership information, hours, amenities, and more. Click "Save Changes" for each section you update.

That's it! Now, shoppers will be able to find your dealership's information, links to your website, reviews from other customers, as well as all of your current inventory.

You can view your page by clicking on the "View Branding Page" link on the "Settings" page.
